Zaijing Liu (Human Factors Engineer)

San Jose | Chlora006@gmail.com | LinkedIn | Portfolio Website

PROFESSIONAL SUMMARY

Human Factors Engineer with a background in Human Factors and Computer Science, experienced in experimental design, human performance evaluation, usability testing, and quantitative and qualitative data analysis. Skilled in conducting participant-based research, analyzing experimental data, and translating findings into evidence-based recommendations for human-centered systems.

EDUCATION

San Jose State University, **San Jose, CA**
Master of Human Factors/Ergonomics **Aug 2025 – Expected Dec 2027**

San Francisco State University, **San Francisco, CA**
Bachelor of Computer Science **Aug 2020 – May 2025**
Minor in Design

EXPERIENCE

Research Assistant — Bat Lab, San Jose State University **Sep 2025 – Present**

Project: Wearable Haptic Devices for Automated Driving TOR **Sep 2025 – June 2026**

- Designed and conducted a controlled human factors experiment evaluating wearable haptic takeover requests in automated driving.
- Implemented a within-subjects study comparing four wearable feedback configurations with a seat-based baseline.
- Recruited participants and moderated driving simulation sessions following standardized research protocols, collecting takeover performance and user preference data.
- Conducted quantitative and qualitative data analysis to evaluate differences across feedback conditions and communicated findings through presentations and evidence-based design recommendations.

Lab Manager — Bat Lab, San Jose State University **Jan 2026 – Present**

- Managed daily lab operations, ensuring smooth execution of research activities and user sessions
- Trained students and researchers on lab equipment and experimental procedures
- Supported research studies by maintaining experimental setups, including driving simulation systems

Product Associate – Sweatchi **Jun 2026 – Aug 2026**

- Analyzed user feedback to identify usability issues and inform a homepage refresh.
- Translated user insights into prioritized design recommendations and product updates.
- Collaborated with design and engineering teams to support the implementation of homepage improvements.

PROJECT EXPERIENCE

Safeway App Redesign **Sep 2025 – Dec 2025**

- Designed and facilitated usability testing using structured research protocols.
- Conducted heuristic evaluation and analyzed qualitative and quantitative user feedback.
- Synthesized findings into research insights and prioritized recommendations, validating improvements through iterative testing.

Honors & Award

- Phi Beta Kappa, San Francisco State University, 2025
- Dean’s list, 2021 - 2024

SKILLS

Research & Human Factors: Usability Testing, Experimental Design, Interviewing & Survey Methods, Participant Recruitment, Data Collection & Analysis (Quantitative & Qualitative), Accessibility Evaluation
Technologies: SPSS, MATLAB, Python, Axure, Figma, Adobe Photoshop, Illustrator, InDesign, React, JavaScript, HTML / CSS
Languages: English, Chinese
